WENGER®
THE GENUINE SWISS ARMY KNIFE™

Wenger History

Over 100 Years of Quality:

It dates back to 1886 when the Swiss Army decided to equip every soldier with a regulation single blade folding knife. In 1889 a new rifle was introduced. To disassemble the rifle a screwdriver was needed. So a decision was made to create a multi-purpose tool incorporating a knife, screwdriver, reamer and can-opener. The Swiss Army Knife was born. They are not only produced rapidly and efficiently, but they are precision made, beautifully crafted and superbly finished.

Since the beginning, there has been two manufactures of the Swiss Army Knife, Wenger is in the French speaking Jura Region and its competitor is in the German speaking region of Schwyz. To avoid friction between the two cantons, the Swiss government decided in 1908 to award each supplier orders for exactly half of its requirements, a decision that still stands today. In any case, both companies have been manufacturing Swiss Army Knives for over 100 years and both must meet identical specifications laid down by the army. The Wenger company turns out 25,000 knives a day, nearly one a second.

It wasn't until after World War II that the Swiss Army Knife entered into worldwide distribution. The American GI discovered it. In the USA, it became known as the survival knife, and was even featured in a television action series "MacGyver", where the hero overcame all sorts of obstacles with his trusty Swiss Army Knife. Today the Swiss Army Knife is popularized throughout the world and has many imitators. But only the authentic knives are permitted to wear the distinctive Swiss Cross. And it is Wenger that exemplifies continuing innovation and technology growth. With 100's of models available in various designs to meet the particular needs and lifestyles, such as golfing, hunting, fishing, mountain biking or simply driving your children to school. Wenger has also produced a variety of deluxe models that combine aesthetic appeal with practicality. They are not only produced rapidly and efficiently, but they are precision made, beautifully crafted and superbly finished.
